What is the Hygiene Pocket project?

According to the *Housing and Homeless Coalition of Central New York* and the *Syracuse Post Standard*, the amount of homeless people in CNY has increased 40% post pandemic. Though it might be hard to provide a home, we can provide regularly needed products that might otherwise be difficult to afford in the current economic climate, to help get people back on their feet.

It's our goal as a public library, serving its community, to "provide and promote free access to high quality resources to meet informational, educational, and cultural needs of (our) community," as stated by the library's vision statement.
